REASONS FOR ALLOWANCE

1. Claims 1-3 and 7 are allowed.
2. Claims 4-6 are cancelled.
3. The following is an examiner's statement of reasons for allowance:

The prior art of records fails to disclose or render an obviousness of a processor and method respectively comprising: at least one floating-point execution unit including a separator and at least one adder unit for adding mantissas; a compare unit configured to make available a carry-out bit value resulting from an addition of the mantissas portion; an end-around-carry bit calculator unit coupled to compare unit and configured to provide a correct value of an EAC calculation; and a rounding calculator unit coupled to the EAC bit calculator to calculate a rounding choice upon having the adder unit complete the addition and communicating the choice to the adder unit as seen in independent claims 1 and 7.

The closest found prior art is Oberman et al. (U.S. 6,298,367). Oberman et al. Disclose a floating-point addition pipeline including extreme value, comparison and accumulate functions comprising: a floating-point execution unit, a compare unit, and an end-around-carry bit calculator unit. However, Oberman et al. fail to disclose in detail the rounding calculator unit coupled to the EAC bit calculator to calculate a rounding

choice upon having the adder unit complete the addition and communicating the choice to the adder unit as seen above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
